

STEEL HINGED GARAGE DOORS

ROBUST Garage Doors are a complete steel hinged door system designed to combine traditional timber designs with the enhanced security features inherent from a steel doorset.

GARAGE DOORS

Low profile frame design allows maximum width clearance.

Heavy duty low maintenance polyester powder coat finish.

Hinged doors allow easy entry without limiting headroom.

Manufactured in a range of traditional timber designs.

Lightweight twin skinned steel doorset with mineral wool infill combines strength and security with ease of operation.

Choice of standard or high security locking options.

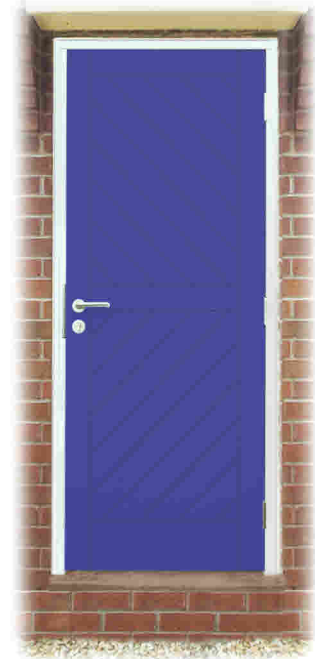

Available in a range of standard patterns with sizes to suit both imperial and metric openings in a range of six standard colours.
