STEEL SECURITY SOLUTIONS

PRODUCT OVERVIEW

Our strong and stylish steel security doors are custom-built to deliver proven performance where protection is critical. Designed to withstand forced entry, harsh environments and heavy use, our doorsets combine uncompromising strength with exceptional durability.

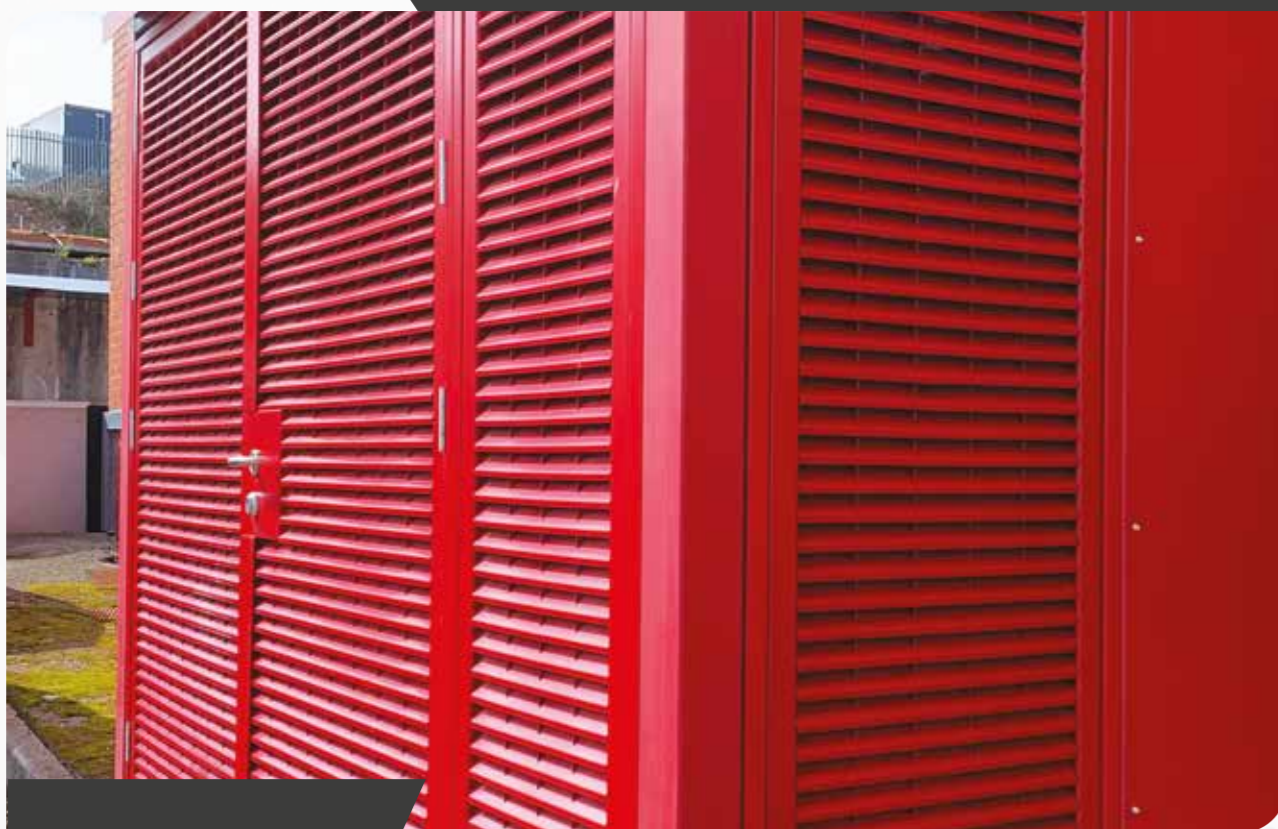

Third-party certified to LPS 1175 or PAS 24 (2022), our steel security doors are also Secured by Design approved; the official Police initiative to “design out crime”.

With a broad range of options tested to leading standards and compatible with advanced locking and access control systems, our doors provide a secure, long-lasting solution at a variety of security levels to suit your requirements.

APPLICATIONS

Engineered for commercial and industrial premises, our security-rated doors deliver enhanced protection beyond the capabilities of standard steel doors.

From light commercial properties such as warehouses, educational facilities, and offices to high-security environments like data centres and government buildings, we offer a comprehensive range of security-rated steel door solutions certified to a variety of standards, ensuring the right specification for every project.

KEY BENEFITS

Enhanced Security

- Reinforced cores, security rated locking systems, anti-jemmy astragals, and strategic internal reinforcement all combine to create a truly robust solution.
- We offer a broad range of solutions to various security standards, including LPS 1175 (Issue 7 & Issue 8), PAS 24 (2022), EN 1627 (RC2 to RC4), and ballistic resistance to EN 1522-2.

Versatility

- Many of our security products can be configured as a fire exit with panic hardware compliant to BS EN 1125 or BS EN 179.
- SECUR-DOR 2.1 and TUFF-DOR 2.1 can be fire rated for up to 60 minutes on request (certain specifications only).
- Fully louvered doorsets with PAS 24 certification are available, ensuring strength and security without compromising on airflow.

Durability

- Impact resistant – whether that’s from knocks, vandalism, or wear and tear.
- Manufactured from Magnelis® steel for exceptional strength and unrivalled corrosion protection.
- Up to 10 years warranty.

If you're looking for an entry level steel security door that offers exceptional value, our PAS 24 certified SECUR-DOR 2.1 is ideal. For applications that require continuous ventilation without compromising on security, TUFF-VENT provides a fully louvred solution that's PAS 24 certified, whilst our TUFF-DOR range is tested to LPS1175 with TUFF-DOR 2.1 certified to B3 (SR2), TUFF-DOR 3 to SR3 and TUFF-DOR 4.1 to SR4.

Product	Description	Security Rating	Fire Rating*	Warranty**
TUFF-DOR 2.1	Ideal for light commercial premises requiring enhanced security.	LPS1175 B3 (Issue 8)	60 minutes on request	10 years
