

ROBUST

SLEEK. STYLISH. STRONG.

ACTIV-DOR

The next generation in sports hall door design.

Purpose-built for performance and protection.

Designed for sports environments where safety, durability and design matter most, the ACTIV-DOR from Robust UK delivers a completely flush finish and panic touch bar operation, making it the ideal solution for modern sports halls.

Fully compliant with Sport England guidance, ACTIV-DOR minimises injury risk, ensures fast emergency exit, and enhances the professional finish of any sports facility.

Built for movement. Built to last.

PRODUCT OVERVIEW

ACTIV-DOR is an emergency exit that combines robust steel construction with a modern redesign, specifically engineered for high-traffic sports and leisure environments.

With continuous rebound panels incorporating a flush panic touch bar, it's specifically designed to meet Sport England's requirements for safety, functionality and impact resistance. ACTIV-DOR is also easy to install, compliant with BS EN 1125, and offers up to 10 years anti-corrosion warranty.

Every doorset is manufactured in the UK to order, customisable as required.

APPLICATIONS

Ideal for:

- School sports halls and gymnasiums
- Leisure centres
- Activity centres
- Multi-purpose recreational spaces

KEY BENEFITS

Architectural Continuity

- Singular full length rebound panel with integrated push bar reduces snag points and player collision risk.
- 130mm thick door leaf sits level with the frame and internal wall for a seamless finish that's practical and visually appealing.

Easy Operation

- Touch bar is easy to use in an emergency, and fully compliant with BS EN1125 for panic exits.
- Flush pull handles enable door closure without any protruding hardware.

Durability

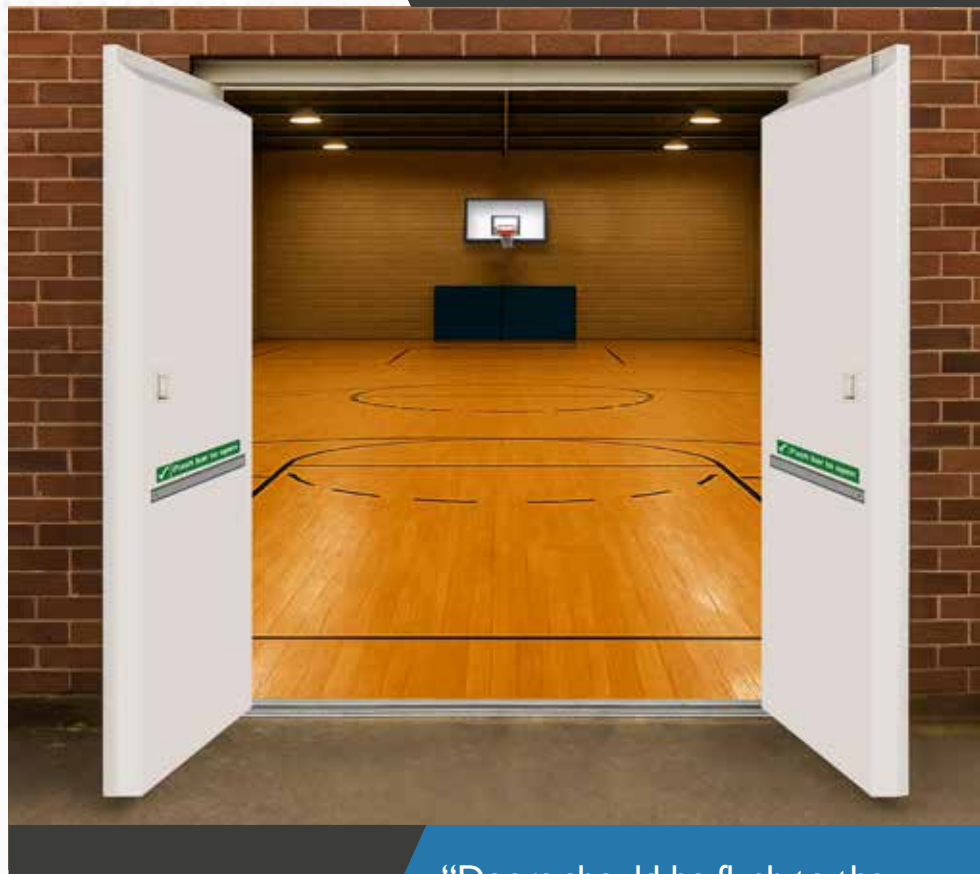

- Manufactured from Magnelis® steel for exceptional strength and unrivalled corrosion protection.
- Impact resistant – whether that's from knocks, vandalism, or wear and tear.

Low Maintenance

- Flush design creates an easier to clean surface.
- Chamfered finish to top of rebound panel ensures no resting ledge for projectiles.
- Does not require painting, sealing or refinishing.

Versatility

- Available as single or double doorsets.
- Compatible for use with over panels and side panels for particularly large openings.
- PPC finish in any specified colour for seamless integration with walls.

“Doors should be flush to the internal wall surface, with panic latches or touch bars instead of projecting hardware, to avoid injury or obstruction during play.”
